The COVID-19 pandemic has stressed the need for United Nations peacekeeping missions to reassess which of their activities are essential for carrying out their mandated responsibilities. Missions have cut back significantly on some operations, such as those on protecting the DRC, and the rest of the UN system. UN agencies are relying increasingly on electronic communication, including via video-conferencing, and this has helped to continue mission activities. Almost all UN staff are working from their homes or their mission accommodations, and this means that almost all work is now being done electronically, including via videoconferencing, and this has helped to continue mission activities.

Almost all staff are working from their homes or mission accommodations, and this means that almost all work is now being done electronically, including via videoconferencing, and this has helped to continue mission activities. Almost all staff are working from their homes or mission accommodations, and this means that almost all work is now being done electronically, including via videoconferencing, and this has helped to continue mission activities.
